

Teacher key

For the two student sheets: "The 24 Faces" and "Find the Pair!" — NOT given to students. Pairs with this photo set are rarely unique — several pictures often share the same true comparison. Each row gives one worked example; accept any pair the student can defend by pointing at the pictures (or the height dots under each photo, which come straight from the same stat used in the Somerset Arcade). No auto-scoring here either — same rule as the Arcade: you judge it.

#	SENTENCE	EXAMPLE CORRECT ANSWER
1	has longer hair than	e.g. 16 & 4 (others may also be correct)
2	has shorter hair than	e.g. 24 & 13 (others may also be correct)
3	has curlier hair than	e.g. 15 & 22 (others may also be correct)
4	has straighter hair than	e.g. 9 & 23 (others may also be correct)
5	has darker hair than	e.g. 21 & 18 (others may also be correct)
6	has lighter hair than	e.g. 2 & 7 (others may also be correct)
7	is taller than	e.g. 20 & 11 (others may also be correct)
8	is shorter than	e.g. 5 & 12 (others may also be correct)
Bonus	is taller AND has curlier hair than	e.g. 21 & 18
Bonus	has longer hair AND darker hair than	e.g. 19 & 18

WHY THE HEIGHT DOTS AND NOT REAL CM

The 24 photos are head-and-shoulders only — nobody can see real height in them. The dots are the same 1-10 stat already on the physical Top Trumps deck, just shown here so a height question has an honest, checkable answer instead of a guess.
